

Human Performance Group Factual Report

Attachment 2

The Pipeline Controller's Timeline of Events at the Liquid Control Center on November 1, 2007

Carmichael, Mississippi
DCA 08 MR 001

11/1/2007

10:35 CR unit 2 goes down on low suction. Line pressure drops to 154psi at CR and flow past CR goes to 7126.

10:36 S/D YC pump. Closed YC station suction valve. Notified Control Room Supervisor of Leak.

10:37 Started Butler pump to pull off pack.

- ② 10:38 Started calling field personnel to head to the area. Sent John P. and Jerry B. from HA going east and sent Milton M. and Stewart W. from DM heading west. Continued shutting down the mainline and calling injectors to get everything shut in.

10:40 Butler goes down on low suction. Continued making calls and shutting down the mainline.

10:41 Received a call from [REDACTED] (land owner) reporting there was a major leak and explosion right outside our station behind her house at 8520 CR 630 Shubuta, MS. [REDACTED].

10:42 Called Clarke County 911 (Seola 601-776-3956) and they already had 3 units dispatched to the scene. Explained to them this was a propane leak. Continued making calls and shutting down the mainline.

10:46 Received a call from [REDACTED] stating there were 4 major explosions, fire 200ft in the air, and two columns of white and black smoke. He says leak is right where Hunt Crude oil crosses Dixie. John reports he has a contractor in the area and is directing him to 437.43. Continued making calls and shutting down the mainline.

10:48 Joe Depsy from Hunt Oil says there line is shut down and blocked off in the area.

X 10:53 Shut Butler Station Suction Valve.

10:55 Shut Carmichael station suction and discharge valve.

11:39 John P. reports MBV 437.43 is closed.

12:36 Jere B. reports MBV 422.63 is closed.
